SK8SCORE

sk8score is a suite of software applications designed to allow both wired and wireless scoring of roller skating competitions. It has been developed and utilised for scoring skating competitions since 1999 in Australia and at world championships in 2007, 2008 and 2009. The suite consists of:

sk8score	Main application
sk8videoscore	Video scoreboard application
sk8judge for PC	PC based judges terminal
sk8ref for PC	PC based referee terminal
sk8judge for Nintendo DS	DS based judge / referee terminal
sk8judge for mobile 5	PDA based judge / referee terminal

These applications allow a system to be configured as either a wired (ethernet) system using PC based versions, or wireless using PDA or Nintendo DS to allow judging of figures from the venue floor. The main application interfaces directly with the CIPA calculating program to allow marks to automatically enter the database and results to be immediately displayed under control of the CIPA program.

The main features of the software suite are shown below:

REFEREE:

- Allows monitoring of judges marks as entered.
- Calculates average over all marks or optionally with upper and lower marks removed.
- Allows display of A and B marks individually.
- Allows skater selection.
- Allows sending of warning to judge who is too high.
- Allows sending of warning to judge who is too low.
- Allows warning of both highest and lowest judges if both out of range.
- Allows sending of referee penalties to the judges.
- Allows setting of warmup period and display onto video screen.
- Provides all necessary control over event for the referee.
- Provides referee with skater name and number.

JUDGES:

- Allows entering of marks for both single mark and dual mark events.
- Receives and displays average for judge and ensure mark is within 0.2 of average.
- Receives and displays warnings to the judge.
- Receives and applies penalties for the judge.
- Provides audible alert to ensure the judge is aware of average, warning, penalty before application.
- Easy and quick to use.

SK8SCORE

VIDEO:

- Displays all event details as controlled by the referee.
- Provides warm up timer.
- Provides practice / event clock..
- Provides message display.
- Provides slide show capability.
- Provides display of event results or skating order.
- Allows for dual panels of scoring applications.
- Configurable positioning, colours and size to allow fitting with most video system requirements.

EVENT:

- Allows monitoring of event from calculator desk.
- Provides assistance to referee if required.
- Allows display of messages.
- Allows display of results.
- Allows display of skating order.
- Allows selection of event from calculator database.
- Provides flexible configuration of event operations.
- Supports 3, 5 or 7 judge configurations.
